

Sinclair's "brilliant idea" to air this "news show" is just to confuse and further alienate Americans. I don't know if any of you at the FCC has seen the news in recent years, but it is fairly damn bad. Regardless though he uses public broadcast and I think that this is really not in the public interest. I mean his company did give 97% of all its political contributions to the GOP I do think there is some bias here. The FCC often talks about the better of the public, and I really don't see anything that really helps me or better me in anyway but if you do want to do something that can really help the citizens of this country, do something about this. Do not allow it to air. I think it is a direct response to Michael Moore's 9/11 but the difference here is you had to get up and pay to go see the movie. This will be 24% of Americans homes and the local affiliates have no choice but to air it. That is some democracy there, so please do something make it fair and take huge corporations out of the media give us more choice's it's the only American thing to do. Thank you for taking the time to read my letter and God bless America.
